Grammar

5719 Present Tense, Indicative Mood

5723 Present Tense, Participle Mood

Indicative Mood: The indicative mood is a simple statement of fact. If an action really occurs or has occurred or will occur, it will be rendered in the indicative mood.

Participle Mood: The Greek participle corresponds for the most part to the English participle, reflecting "-ing" or "-ed" being suffixed to the basic verb form. The participle can be used either like a verb or a noun, as in English, and thus is often termed a "verbal noun."

Present Tense: The present tense represents a simple statement of fact or reality viewed as occurring in actual time. In most cases this corresponds directly with the English present tense.
